

HiQ-EOS-1/EOS-4

Standalone or linked!

Thermopatch
Since 1934

Highlights • Standalone operation with keyboard • Small footprint • Large colour touch screen display • USB and Ethernet interface

Are you looking for a textile label printer to label textile items like workwear, personal clothing, sheets, table linen, etc.? Please have a look at the HiQ-EOS-1/EOS-4 printer that offers you full flexibility and can be setup to your needs.

The HiQ-EOS-1/EOS-4 can be used in the following configurations:

Standalone

One of the great features of this printer is that it can run standalone with a standard USB keyboard attached. The label design has been defined in advance and stored on a USB stick or in the printer's own memory. Variable data, as defined in the design, and required labels can be entered by the keyboard.

No PC... No software... No hassle...

In combination with one of our heat-seal presses, like the HS-21-SQR or the HS-4-C, you have an economical easy-to-use labeling system for textile items.

Connection with a PC or network

The HiQ-EOS-1/EOS-4 printer comes standard with a USB 2.0 and an Ethernet 10/100 interface to connect the printer with a PC or network.

With our software programs 'Make Your Mark' or 'Bartender' you can make any label you need.

The HiQ-EOS-1/EOS-4 is available in 2 configurations:

- without cutting device for the use of perforated tape (die-cut)
- with cutting device for the use of continuous tape

Label media

Both printers support various sorts of label tapes, like HiQ, Hytex, CombiTex, CombiPly, Mediron, Med-Low and FasTag.

The HiQ-EOS-1 is for label rolls up to diameter 155 mm. The HiQ-EOS-4 is for label rolls up to diameter 210 mm, further technical details are identical to the HiQ-EOS-1.
