Truflex

Strong and versatile

Thermopatch
Since 1934

Highlights • High quality images • All colours available • Versatile • Industrial wash

What is Truflex?

The Truflex transfer is a versatile one! Because of the special composition of the base material Truflex has the suppleness to follow the folds of the garment. This strong and versatile transfer is available in any colour and size combination. Obviously it is resistant to industrial cleaning. The transparency of the layer has strengthened the colour fastness and enables the positioning of the transfer

Many fabrics

Truflex can be used on virtually any kind of non stretchable fabric, including nylon, flame retardant and clean room material.

Applications

Truflex is ideal for heavy use corporate work wear. This is especially true for garments used by the armed services, emergency services and companies in the security and safety industry. It is also perfectly suited for protective clothing with a flame retardant finish. In fact, in any environment where the garment is subject to heavy use.

This transfer is in compliance with the safety requirements of the European norms EN 469, NEN ISO 11611 (replaces NEN EN 531) en NEN ISO 11612 (replaces NEN EN 533). You can find our declaration in our Specifications Brochure on our website. For a copy of the report you can contact www.thermopatch.nl

Quantities

Truflex transfers are delivered with a minimum quantity of 25 pieces.

Flame retardant on Nomex®

- EN ISO 14116:2008 3/5I/75
- EN 469:2005
- EN ISO 11612:2007
- EN ISO 11611:2008
